professional skills

DEVELOPMENT:

Construct dynamic websites by integrating the best practices in HTML, CSS, PHP, & jQuery.
Produce and publish custom Wordpress Themes.
Create responsive websites using custom responsive grid as well as established responsive frameworks such as Bootstrap.

CONCEPTUAL:

Develop ideas through use of multiple disciplines.
Render high quality mockups as a representation of the final product.
Create original concepts based on client ideas and suggestions.

DESIGN:

Craft website layouts and print designs based on solid color theory and design principles.
Strong comprehension of typography and how to apply it to web and print design.
Apply creative process to produce logos and brand identities.

PERSONAL:

Work well in a creative team environment to communicate ideas and concepts.
Manage coworkers, clients, accounts, and tasks efficiently.
Apply creative, systematic thought process to solve problems and achieve goals.
